PROFILE

Robotics Systems Engineering student with hands-on experience in Linux, Python, and system integration through robotics and engineering projects. With a background in networking and business technology, I bring a cross-disciplinary perspective to technical challenges. Eager to apply my skills, grow, and contribute to a real-world engineering setting.

EDUCATION

Singapore Institute of Technology Bachelor of Engineering with Honors in Robotics Systems	Sep 2024 – Present
Nanyang Polytechnic Diploma in Business and Financial Technology	Apr 2019 – Apr 2022
ITE College Central Nitec in Info-comm Technology (Networking & Systems Administration)	Jan 2018 – Dec 2019

EXPERIENCE

Singapore Armed Forces Section Commander - Led section through military exercises ensuring mission objectives were met - Managed technical equipment as TES In-charge maintaining operational readiness	May 2022 – May 2024
CFM Holdings Pte Ltd Intern - Web development and e-commerce - Digital marketing including SEO and content planning help to boost online pressure 24%.	Oct 2021 – Mar 2022

PROJECTS

Omnidirectional Perception System (OPS) - Built multi-camera system fusing OCR and barcode data for industry clients - Reduced scan time from 6.2s to 2.8s within budget constraints	Jan 2025 – Mar 2026
System Engineering Project 1 - Designed autonomous LIMO robot navigation arena using ROS1 and SLAM - Applied systems engineering principles including sensor integration and path planning	May 2025 – July 2025

SKILLS

Technical:

-Python, C, #C, C++, ROS 1&2, HTML/CSS, SolidWorks, SQL, MYSQL, GitHub, Linux

Soft Skills:

- Communication, Teamwork, Active Listener, Adaptability, Problem Solving

Language:

- English (Spoken & Written), Mandarin (Spoken)
