PROFILE

Engineering in Robotics Systems student with experience in tech development and system engineering. I am passionate about solving real-world problems through innovative.

EDUCATION

Singapore Institute of Technology	Sep 2024 – Present
Bachelor of Engineering with Honors in Robotics Systems	
Nanyang Polytechnic	Apr 2019 – Apr 2022
Diploma in Business and Financial Technology	
ITE College Central	Jan 2018 – Dec 2019
Nitec in Info-comm Technology (Networking & Systems Administration)	

EXPERIENCE

CFM Holdings Pte Ltd	Oct 2021 – Mar 2022
Intern	
- Web development and e-commerce	
- Digital marketing including SEO and content planning help to boost 24% online pressure.	

PROJECTS

System Engineering Project 1	May 2025 – July 2025
- Designed and built an arena theme Changi Airport T4 for robot navigation.	
- ROS1-based autonomous navigation for the LIMO robot using sensor integration and mapping (SLAM).	
- Applied system engineering principles including system context and system approach.	

SKILLS

Technical:

- ROS 1&2 , Python, C, #C, C++, HTML/CSS, SolidWorks, SQL,MYSQL, Github, Linux

Soft Skills:

- Communication, Teamwork, Active Listener, Adaptability, Problem Solving

Language:

- English (Spoken & Written), Mandarin (Spoken)
