PROFILE

Robotics Systems Engineering student with hands-on experience in Linux, Python, and system integration through robotics and engineering projects. With a background in networking and business technology, I bring a cross-disciplinary perspective to technical challenges. Eager to apply my skills, grow, and contribute to a real-world engineering setting.

EDUCATION

Singapore Institute of Technology	Sep 2024 – Present
Bachelor of Engineering with Honors in Robotics Systems	
Nanyang Polytechnic	Apr 2019 – Apr 2022
Diploma in Business and Financial Technology	
ITE College Central	Jan 2018 – Dec 2019
Nitec in Info-comm Technology (Networking & Systems Administration)	

EXPERIENCE

Singapore Armed Forces	May 2022 – May 2024
Section Commander	
- Led section through military exercises ensuring mission objectives were met	
- Managed technical equipment as TES In-charge maintaining operational readiness	
CFM Holdings Pte Ltd	Oct 2021 – Mar 2022
Digital Marketing & Web Development Intern	
- Improved company website and launched e-commerce platform to drive online sales	
- Implemented SEO and content planning, boosting online presence by 24%	

PROJECTS

Omnidirectional Perception System (OPS)	Jan 2025 – Mar 2026
- Built multi-camera system fusing OCR and barcode data for industry clients	
- Reduced scan time from 6.2s to 2.8s within budget, achieving 100% accuracy across test cases	
System Engineering Project	May 2025 – July 2025
- Designed autonomous LIMO robot navigation arena using ROS1 and SLAM	
- Applied systems engineering principles including sensor integration and path planning	

SKILLS

Technical:

-Python, C, C#, C++, ROS 1&2, HTML/CSS, SolidWorks, SQL, MYSQL, GitHub, Linux, OpenCV

Soft Skills:

- Communication, Teamwork, Active Listener, Adaptability, Problem Solving

Language:

- English (Spoken & Written), Mandarin (Spoken)
